

HOSE CONSTRUCTION:

Extruded inner core made of natural PTFE certified in accordance with RoHS Directive and U.S. Federal Food and Drug Administration's (FDA) Regulation 21 CFR 177.1550. Premium choice materials and advanced technology guarantee high flexibility and minimum porosity. Outside reinforcement: AISI 304L wire braid with high tensile strength.

Maximum Working Pressures calculated using a Safety Factor of 4 | To guarantee quality and reliability of our products, all PTFE inner cores are tested under pressure.

OPTIONS:

Customized inner core construction (sizes, thickness). Inner core made of black antistatic PTFE when electrically resistive fluids are transferred at high flow rates. Hoses with inner cores made of other fluoroplastics (e.g. FEP, PFA). Outside reinforcements: AISI 316 - textile braids (e.g. aramid, polypropylene or polyester). Additional reinforcements for superior performances. Special jacket made of thermoplastics (e.g. Polyurethane, PA11, PA12, Hytel, PVC), silicone or wrapped rubbers.

APPLICATIONS:

Chemical, petrochemical, paints, inks, glues and adhesives, foodstuffs, brake oils, fuels, hydraulic oils, steam, gases, detergents, refrigerants and any application focused on the transfer of fluids and gases under critical usage conditions and in severe environments.
